Upgrade your obsolete Dynalco TM-5000 scanner to the current Dynalco SC-2124

The TM-5000 is being obsoleted and has limited repairability. Replacement option is the powerful Dynalco SC-2124 Universal Scanner.

The Dynalco SC-2124 continuously monitors temperature, pressure, and speeds. SC-2124 can handle up to 24 channels of analog signals, accepts J & K thermocouples, RTDs, 0-5V and 4-20mA signals for maximum flexibility.

DYNALCO

Advantages of upgrading to the SC2124 Universal Scanner

TM5000	SC2124
EPROM programming at the factory	Program with front keypad or Winhost host software
Single input display only	Displays up to (4) channels at a time
Generic naming only	Custom named channels
Modbus not available	Optional Modbus communications available
One input type for all channels	Configurable to accept a variety of input types
All wiring to a single terminal board	Easy wiring utilizing DIN rail mountable terminal blocks

Contact GCS to replace your obsolete scanner on your application.
